Meth Lab Assessment & Decontamination Course (Worker/Supervisor Training)

To help contractors meet the training requirements for cleanup standards for clandestine methamphetamine labs, the Montana Department of Environmental Quality is sponsoring 2-day training courses for worker/supervisor certification. Sessions will be held in both Missoula and Billings, MT (please see inside for specific dates and locations).

Training course content will include information on applicable regulations; chemical terminology, classifications, and properties; clandestine methamphetamine laboratory characteristics; first aid; adverse health effects; chemical incompatibility; techniques and equipment used for decontamination; handling unknown substances; state and federal requirements for hazardous substances; and obtaining necessary information for making site assessments.

Training participants will have the option of choosing the test specific to "worker" certification or "supervisor" certification.

Independent of the worker/supervisor training, Safety & Health Services, Inc., will be offering an **8-hour OSHA Supervisor Course** May 11 and May 25 for those wishing to meet the requirement noted below (Both sessions to be held at the same location)

Before "supervisor" certification is issued, proof of current OSHA Supervisory Certification is required.

WHEN & WHERE

May 9 & 10, 2006

8:00 am – 5:00 pm
Ruby's Reserve Street Inn
4825 N. Reserve St
Missoula, MT 59801

May 23 & 24, 2006

8:00 am – 5:00 pm
